

Smart In Wall Amplifier with WiFi and Bluetooth SP-PW230

Compact smart home music controller with 2x30W digital stereo amplifiers built into a single glass wall plate. Powered directly from AC110-240V mains supply, the wall mount amplifier can be installed into a partition wall or 53mm back box and provides a minimal yet fully functional control surface. The on wall amplifier has an built-in Wi-Fi DLNA playing, USB/TF, audio input, and Bluetooth receiver, with a 52x28mm screen touch button. Key functions are operated from the front panel or by using the supplied IR remote control. Connections for 2 low impedance 8ohm speakers, rated power output 30Wx2. A complete and versatile audio solution for wall or ceiling background music speakers in the home, office, restaurant, shop or other commercial audio background music applications.

Features:

- With Wi-Fi APP mobile control & Bluetooth wireless connectivity
- Rated power output 2 x 30 watts
- Support USB/TF media player, audio input
- Supplied with I.R. remote control
- Volume control on panel keys or the supplied IR remote control
- LCD English display the music title and music number with touch button operation on front panel

Specification:

Model	SP-PW230
Description	Smart In Wall Amplifier with WiFi and Bluetooth
Media Sources	Wi-Fi DLNA playing, USB/TF, audio input, and Bluetooth
Rated Power Output	2×30W@ 8 ohms
Frequency Response	20Hz~20KHz (at±0.3dB)
Distance	IR remote control & Bluetooth distance up 10 meters
THD	<0.03% at 1kHz, 1W
SN Ratio	>98dB
Volume	Bass: ±15dB; Treble: ±15dB
Power Supply	110-240V AC, 50/60Hz (screw terminal)
Dimension	86*86*53mm
