

## SP-PA1000,SP-PA1200,SP-PA1500,SP-PA2000 Power Amplifier

### Features:

- With RCA, XLR jack, it is very suitable for broadcasting in large, medium and small public area.
- Equipped with 100V, 70V constant voltage output and 4~16Ω constant resistance output, compatible with public address system and professional stereo sound system.
- Output volume control.
- LED level display: output signal strength, distortion status, protection prompts, easy to observe the working conditions.
- Perfect protection functions for overvoltage, overcurrent, short circuit, midpoint drift and over temperature.
- Excellent noise control, can comparable to professional power amplifiers.
- Unique input signal automatic compression function, the output signal will never be distorted, and the speaker will not be damaged due to excessive input signal or human error operation.
- Stepless speed regulation fan, the speed changes with temperature, high efficiency, energy saving, silent, to ensure good heat dissipation.
- Full-chip circuit, professional modular circuit design, to ensure the reliable consistency of the product.
- Stronger cabinet 1.5MM thickened body ensures that the product will not be deformed due to harsh transportation environment.

### Specifications:

item	value
Certification	FCC, ce, RoHS
Brand Name	SURPASS
Model Number	SP-PA1000
Type	Professional Amplifier
Place of Origin	China
Product Name	SP-PA1000
Rated Power	1000W
Keyword	Sound Speaker
Color	Black

Resistance output	4~16Ω
LED level display	output signal strength, distortion status
Application	Stage/Home/Theater/Conference room
Material	Full-chip circuit
Certificate	CE ROHS FCC
Weight	22Kg
